

# First aid fact sheet

## DRSABCD action plan

**Danger** Check for danger and ensure the area is safe for yourself, bystanders and the patient.

**Response** Check for a response: ask name and squeeze shoulders. **NO RESPONSE?** Send for help. **RESPONSE?** Make comfortable; monitor breathing and response; manage severe bleeding and then other injuries.

**Send for help** Call **Triple Zero (000)** for an ambulance or ask a bystander to make the call. Stay on the line. [If you are alone with the patient and you have to leave to call for help, first turn the patient into the recovery position before leaving.]

**Airway** Open the patient's mouth and check for foreign material. **FOREIGN MATERIAL?** Roll the patient onto their side and clear the airway. **NO FOREIGN MATERIAL?** Leave the patient in the position found, and open the airway by tilting the head back with a chin lift.

**Breathing** Check for breathing Look, listen and feel for 10 seconds. **NOT NORMAL BREATHING?** Ensure an ambulance has been called and start CPR. **NORMAL BREATHING?** Place in the recovery position and monitor breathing.

**CPR** Start CPR: 30 chest compressions followed by 2 breaths. Continue CPR until help arrives, the patient starts breathing, or you are physically unable to continue.

**Defibrillate** Apply a defibrillator as soon as possible and follow the voice prompts.

**In a medical emergency call Triple Zero (000)**

**DRSABCD** Danger ► Response ► Send for help ► Airway ► Breathing ► CPR ► Defibrillation
